

Data Access

THREDDS service

We serve netCDF data by means of a thredds server. NetCDF files from which the maps were made (and other additional data) can be downloaded from **THREDDS service**

If you select a data set, you can consult their own catalogue. The data can be downloaded from each catalogue following the links OPENDAP, HTTPServer or NetcdfSubset. The data files are password protected but you can obtain your login data by filling the [form](#) at the end of this page

If you are interested into automatically download some netCDF products use our [getBEC](#) bash script
