

SMOS in a Massive Open Online Course

The Barcelona World Race Ocean Campus has organised five courses on Instructure Canvas platform to provide the 2014-2015 round the world regatta followers with basic knowledge about the science of oceanography and other subjects like meteorology, telemedicine, chronobiology or nutrition. One of these MOOCs is "[Oceanography: a key to a better understanding of our world](#)" that includes a module on ocean remote sensing instructed by Jordi Font. This free course will start on April 20th and does not require previous knowledge in oceanography. Feel free to join us in this worldwide adventure!
